Election/Restrictions

1. In light of the amendments filed November 4, 2002 broadening the claims, further restriction is required.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-25 and 38, drawn to an apparatus, classified in class 606, subclass 1.
- II. Claims 31-37, drawn to a method of inserting an instrument, classified in class 606, subclass 1.

3. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process for using the product as claimed can be practiced with another materially different product since it does not require the details of the independent apparatus claims 1 or 9, e.g., an elongated member; a position sensor; a distal member configured to engage tissue in a body; etc.

Art Unit: 3739

4. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
